TIDEWATER PRO AIR

Single Zone Ductless Heat Pumps

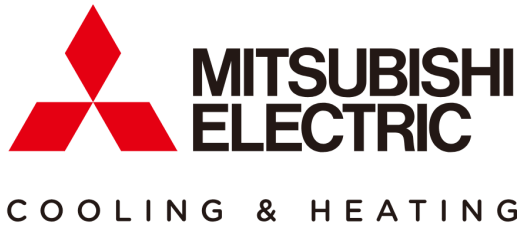

EQUIPMENT INSTALLATION

WHAT EQUIPMENT IS USED?

Depending on the proposal given, either Mitsubishi, Ameristar, or Runtru ductless heat pumps will be the equipment utilized by Tidewater Pro Air. The installation remains the same, so for the purpose of this brochure, just the type of equipment will be named as "Outdoor Condensing Unit" and "Indoor High Wall Evaporator" (or "Indoor Equipment").

Trane and Mitsubishi are now part of a collaboration for ultimate ductless zoning needs

RunTru and Ameristar are ultimately the same equipment with different stickers.

WHAT IS INCLUDED WITH MY INSTALLATION?

See your proposal for exact details, but this list of items below is included with all multi-zone ductless installations. Each job is customized per the proposal, but this gives a good idea of what to expect during an installation by Tidewater Pro Air.

Each installation includes:

One Outdoor Condensing Unit and One Indoor High Wall Evaporator.

High Wall Evaporator

Outdoor Condensing Unit

WHAT IS INCLUDED WITH MY INSTALLATION?

Refrigerant lines are included with refrigerant line set covers whenever the lines will be exposed on the exterior of your home.

WHAT IS INCLUDED WITH MY INSTALLATION?

Each individual indoor High Wall Evaporator comes with its own Remote Control

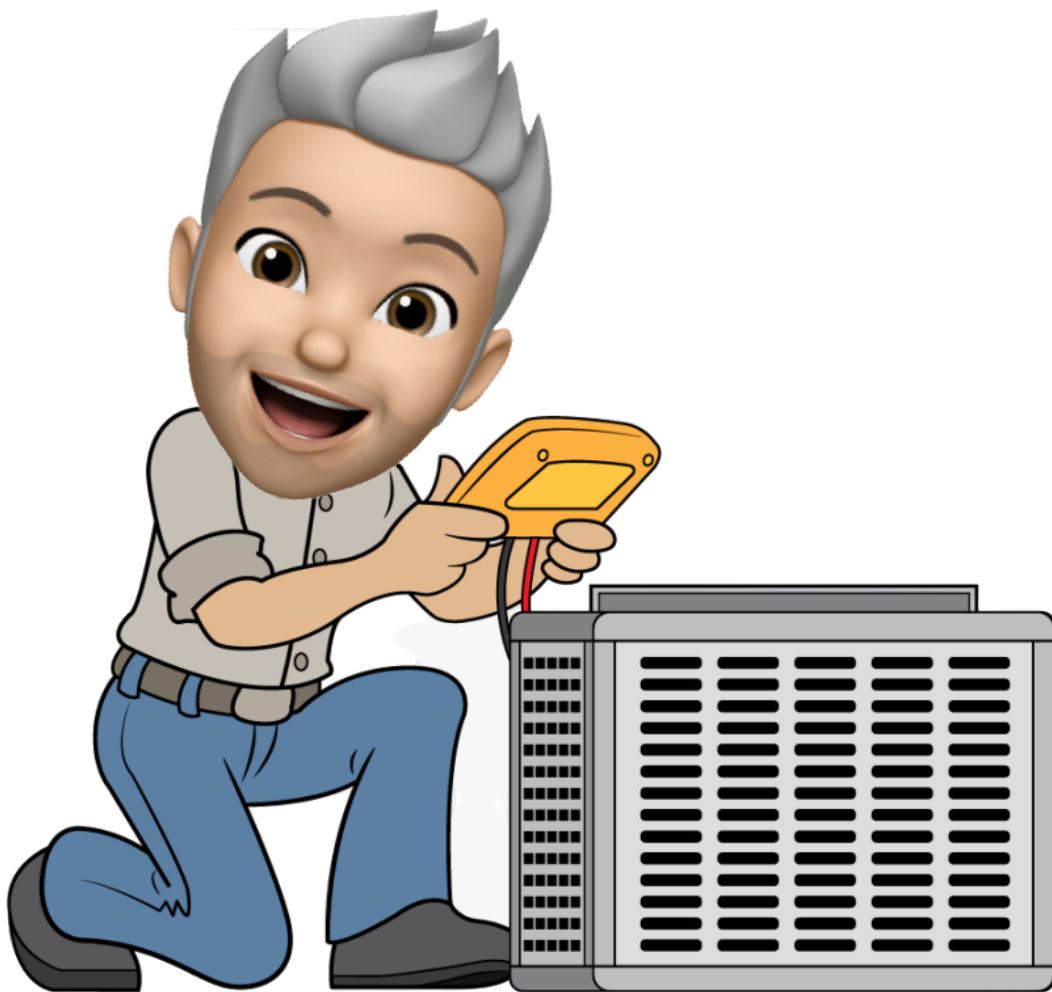

WHAT IS INCLUDED WITH MY INSTALLATION?

Your High Wall Evaporator has easy access for air filter cleaning with reusable air filters that are easily rinsed off to be cleaned.

WHAT IS INCLUDED WITH MY INSTALLATION?

Installation labor is included in your proposal for your equipment and will never change due to the length of installation time.

Lastly, depending on your proposal, a labor warranty is a must have. Ask your technician for more details.
